Application/Control Number: 10/068,838

Art Unit: 1762

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-8, drawn to an apparatus for forming a coating film on a substrate, classified in class 118, subclass 52.
 - II. Claims 9-10, drawn to a method for forming a coating film on a substrate using a gyrating force in the same direction as that of the rotating substrate, classified in class 427, subclass 240.
 - III. Claims 10-11, drawn to a method for forming a coating film on a substrate using a gyrating force in the opposite direction as that of the rotating substrate, classified in class 427, subclass 240.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions II and III, and I, are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another materially different process, for example the apparatus can be used to supply a cleaning liquid or an etchant to the surface of the substrate.
- 3. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

Application/Control Number: 10/068,838

Art Unit: 1762

inventions cannot be used together since Invention II drops coating liquid given a gyrating force in the same direction as that of the rotating substrate, and Invention III drops coating liquid given a gyrating force in the opposite direction as that of the rotating substrate. Inventions II and III require different apparatus structures and therefore have different modes of operation and function and produce different effects.

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. This application contains claims directed to the following patentably distinct species of the claimed invention: gyrating force generation means provided by a spiral groove formed on the inner wall of the hole of said nozzle as shown in Figures 6A-6C and 6E, and gyrating force generation means provided by a plurality of fins provided in the hole of the nozzle as shown in Figure 6D.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 9-12 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Application/Control Number: 10/068,838

Art Unit: 1762

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 6. This restriction requirement is being mailed due to the complexity of the requirement.
- Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kirsten Jolley whose telephone number is 703-306-5461. The examiner can normally be reached on Monday to Thursday and every other Friday.

Application/Control Number: 10/068,838 Page 5
